Profile

Cloud Infrastructure Engineer with over three years of experience designing, automating, and operating scalable Kubernetes-based platforms for enterprise customers. Proven ability to cut deployment times by up to 30 % and improve system reliability through IaC, CI/CD pipelines, and proactive monitoring.

Education

SUPCOM – Higher University Name ill 2021 – 2024

Bachelor of Engineering in Computer Science

Focused on cloud architecture, virtualization, and DevOps practices

Professional Experience

Cloud Infrastructure Engineer ill Sep 2024 – Present

OliveSoft, Sfax

- Designed and deployed three production-grade Kubernetes clusters serving 12 micro-services, reducing average deployment time from 45 min to 30 min (33 % improvement).
- Implemented Terraform-based IaC for AWS and Azure resources, cutting manual provisioning effort by 40 % and eliminating configuration drift.
- Built GitLab CI/CD pipelines with automated testing and blue-green deployments, achieving a 99.8 % release success rate over 18 releases.

Cloud Infrastructure Engineer Intern ill Feb 2024 – Aug 2024

OliveSoft, Sfax

- Assisted in migration of legacy VMs to Docker containers, consolidating 20 servers into a 5-node Swarm and saving 25 % on infrastructure costs.
- Developed Ansible playbooks for automated OS patching across 150+ servers, decreasing mean-time-to-patch by 48 h.

Instructor, IT Infrastructure & DevOps ill Sep 2025 – Present

Faculty of Sciences, Sfax

- Deliver lectures and labs on virtualization, cloud architecture, and Kubernetes to 60+ undergraduate students per semester.
- Supervise capstone projects, guiding teams to achieve production-ready deployments on public clouds.

Intern – Network & Cloud Operations ill Jul 2023 – Aug 2023

Sofrecom Tunisie, Sfax

- Configured and monitored VPN tunnels for 10 corporate sites, improving latency by 15 % and uptime to 99.9 %.

Intern – DevOps Automation ill Jul 2022 – Aug 2022

CodeCooperation GmbH, Tunis

- Created Docker images for a SaaS product and integrated them into Jenkins pipelines, reducing build time from 12 min to 5 min.

Academic Projects

Smart Campus Monitoring System ill Jan 2023 – Jun 2023

- Developed a Kubernetes-based edge computing platform that processed IoT sensor data with 98 % accuracy.
- Integrated Prometheus-Grafana stack for real-time dashboards, decreasing incident detection time by 70 %.

Associative Experience

Teaching Assistant – Cloud Lab ill Oct 2022 – Jun 2024

Skills

% Cloud Platforms: AWS, Microsoft Azure, Google Cloud

Containerization: Docker, Kubernetes, Helm

Infrastructure as Code: Terraform, Ansible, Pulumi

CI/CD: GitLab CI, Jenkins, GitHub Actions

Programming: Python, Bash, Go, Java

Monitoring & Observability: Prometheus, Grafana, ELK Stack

Operating Systems: Linux (CentOS, Ubuntu), Windows Server

Languages

Arabic: Native

French: Professional

English: Professional

Certifications and Awards

- AWS Certified Solutions Architect – Associate (2024)
- Certified Kubernetes Administrator (CKA) (2023)
- Winner, SUPCOM Hackathon – Best Cloud Solution (2022)
