

Maya Patel

Sfax, Tunisia candidate.email@example.com +000 000 0000

Profile

Cloud and DevOps Engineer with a Computer Science engineering background, specialized in designing, automating, and managing cloud-native infrastructures on Azure and Kubernetes. Proven ability to deliver end-to-end MLOps pipelines, improve platform reliability by 30 % and reduce deployment lead-time from weeks to hours through GitOps and IaC practices.

Education

National Engineering University Name ill 2020 – 2025

Bachelor of Engineering, Computer Science

Graduated with honors; GPA 3.8/4.0

Professional Experience

Cloud and DevOps Engineer ill Jan 2026 – Present

OliveSoft, Sfax

- Designed and deployed a multi-region Azure AKS architecture serving +150 micro-services, achieving 99.95 % uptime.
- Implemented GitOps pipelines with Terraform and ArgoCD, cutting infrastructure provisioning time by 70 %.
- Introduced DevSecOps scanning (Trivy, Checkov) that reduced security vulnerabilities by 45 % in the first quarter.
- Mentored a team of 5 engineers, delivering weekly workshops on Kubernetes best practices.

MLOps Engineer ill Sep 2025 – Dec 2025

OliveSoft, Sfax

- Built a Kubeflow-based platform that improved GPU utilization by 35 % across 3 projects.
- Conducted 4 hands-on workshops training 30+ team members on end-to-end MLOps workflows.
- Developed an architecture enabling the DES unit to launch MLOps projects with a 50 % reduction in setup time.

MLOps Engineering Intern ill Feb 2025 – Jul 2025

OliveSoft, Sfax

- Evaluated Azure ML and Kubeflow on AKS, delivering a comparative report that guided a EUR 200 k investment decision.
- Optimized models with TensorRT and ONNX, achieving 2\$ times\$ inference speed-up.
- Deployed a Triton Inference Server on Knative, enabling autoscaling up to 10 replicas and zero-downtime releases.

Data Science Intern ill Jul 2024 – Aug 2024

Sofrecom Tunisie, Sfax

- Contributed to the “ecoKid” mobile app, integrating a TensorFlow Lite model that predicts user age with 92 % accuracy.
- Collected and processed sensor data (gyroscope, accelerometer) from 200 test devices to train the model.

Academic Projects

Resource-Optimized Kubeflow Platform ill Jan 2025 – Apr 2025

- Developed a scheduler that reduced GPU idle time by 40 % across multiple research teams.
- Integrated Prometheus-Grafana monitoring, providing real-time utilization dashboards.

Associative Experience

Member – Computer Science Club, ENIS ill Sep 2021 – Jun 2025

Skills

% Cloud Platforms: Microsoft Azure, Google Cloud Platform

Container Orchestration: Kubernetes, Docker, AKS, GKE

Infrastructure as Code: Terraform, ARM Templates, Helm

CI/CD & GitOps: Azure DevOps, GitHub Actions, ArgoCD, Jenkins

MLOps: Kubeflow, Azure ML, Triton Inference Server, Knative

Programming: Python, Bash, Go, C, PowerShell

Monitoring & Observability: Prometheus, Grafana, Loki, Azure Monitor

Security: DevSecOps (Trivy, Checkov), OIDC, RBAC

Languages

French: Native **English:** Professional **Arabic:** Native

Certifications and Awards

- Google Project Management: Foundations
- Microsoft Certified: Azure AI Fundamentals
- Introduction to Coding (Google)
- Fundamentals of Digital Marketing
