

Olivia Morris

Sfax, Tunisia candidate.email@example.com +000 000 0000

Profile

Data Engineer with 2+ years of experience designing scalable data pipelines and data-warehousing solutions. Proven ability to improve data latency and quality through automation, and to collaborate effectively with cross-functional teams to deliver analytics-ready data.

Education

École Nationale d'Electronique et des Télécommunications de Sfax (ENETCom) ill Sep 2021 – Jun 2024
Engineer's Degree, Data Engineering & Decision-Support Systems

Faculté des Sciences Économiques et de Gestion de Sfax ill Sep 2018 – Jun 2021
Bachelor, Management Information Systems

Professional Experience

Data Engineer ill Aug 2024 – Present
OliveSoft, Gouvernorat Sfax

- Designed and deployed end-to-end ETL pipelines processing >10 million records daily, cutting data latency from 12 h to 4 h (67 % reduction).
- Implemented a data-quality framework that identified and corrected 1,200+ anomalies per month, decreasing manual QA effort by 40 %.
- Migrated on-premise data stores to Azure Data Lake, achieving a 30 % cost saving on storage and enabling near-real-time analytics.

Data Engineering Intern ill Feb 2024 – Jun 2024
OliveSoft, Sfax, Tunisia

- Automated data ingestion from 5 external APIs using Python and Airflow, reducing manual data collection time by 80 %.
- Developed SQL scripts to cleanse and transform raw logs, improving downstream reporting accuracy by 25 %.
- Produced documentation and training material for the data-engineering team, accelerating onboarding of new interns.

Academic Projects

Real-Time Retail Data Warehouse ill Jan 2023 – Jun 2023

- Built a streaming pipeline with Apache Kafka and Spark Structured Streaming to ingest POS data, achieving sub-second latency.
- Designed dimensional models in Snowflake, enabling BI dashboards with 99.9 % query performance SLA.

Predictive Maintenance Model for Manufacturing Equipment ill Sep 2022 – Dec 2022

- Developed a machine-learning model in Python (scikit-learn) that predicted equipment failures with 92 % accuracy.
- Integrated model predictions into a Tableau dashboard used by operations managers, reducing unplanned downtime by 15 %.

Associative Experience

Member, Data Science Club – ENETCom ill Sep 2021 – Jun 2024
Organized monthly workshops on big-data tools and mentored junior students in Python and SQL.

Skills

Programming Languages: Python, SQL, Java, Bash
Data Engineering Tools: Apache Airflow, Spark, Kafka, dbt, Pandas
Cloud Platforms: Microsoft Azure (Data Lake, Synapse), Google Cloud Platform (BigQuery)
Databases: PostgreSQL, MySQL, Snowflake, MongoDB
Visualization & BI: Tableau, Power BI, Looker
Other: Git, Docker, Linux, CI/CD (GitHub Actions)

Languages

Arabic: Native **French:** Professional **English:** Professional

Certifications and Awards

- Google Cloud Professional Data Engineer (2024)

- Microsoft Certified: Azure Data Engineer Associate (2023)
- Winner, ENETCom Hackathon – “Best Data-Driven Solution” (2022)
