

Daniel Kim

Tunis, Tunisia candidate.email@example.com +000 000 0000

Profile

Business and Data Analyst with a strong track record of turning raw data into actionable insights. Experienced in building end-to-end Power BI solutions, automating reporting pipelines, and supporting data-driven decision making for startups and mid-size firms. Passionate about leveraging analytics to create measurable business value.

Education

Université de Tunis ill 2022 – Present

Bachelor of Science in Computer Science

Relevant coursework: Database Systems, Machine Learning, Business Analytics

Lycée de la Manouba ill 2019 – 2022

Scientific Baccalaureate, Honors

Professional Experience

Business Analyst ill Sep 2025 – Present

OliveSoft, Tunis

- Designed and deployed 8 advanced Power BI dashboards (DAX, Power Query) that reduced reporting latency by 45 % and increased stakeholder satisfaction scores to 4.8/5.
- Integrated BigQuery data pipelines and performed UAT/QA for 12 data-migration projects, achieving a 99.2 % data-accuracy rate.
- Applied machine-learning clustering within Power BI to segment 25 000+ customers, enabling a targeted product-recommendation engine that lifted cross-sell revenue by 18 %.

Business Analyst Intern ill Feb 2025 – Jul 2025

OliveSoft, Tunis

- Re-engineered legacy BI models, consolidating 6 data sources into a unified schema and cutting manual data-prep time from 12 h to 2 h per week.
- Conducted stakeholder workshops (15 participants) to capture KPI requirements, resulting in a 30 % increase in dashboard adoption.

Junior Analyst ill Sep 2024 – Dec 2024

V3 Factory, Tunis

- Supported 3 startup clients by preparing investor updates and building financial models that projected a total fundraising potential of EUR 4.2 M.
- Created pitch-deck templates and performed ecosystem analysis for 90+ Tunisian startups, identifying 12 high-growth opportunities for a regional VC.

Marketing & Business Development Intern ill Apr 2023 – Aug 2023

Hi Interns, Tunis

- Authored the official Brand Book and produced weekly social-media content, boosting follower count by 27 % in three months.
- Assisted 5 startups with application dossiers, contributing to a collective EUR 150 k of secured seed funding.

Freelance Marketing Designer ill Jan 2019 – Jun 2025

Self-employed, Remote

- Delivered branding, UX/UI, and pitch-deck design services for 20+ clients, with an average project satisfaction rating of 4.9/5.
- Conducted market-analysis reports that informed strategic pivots for 8 client ventures, leading to an average revenue uplift of 22 %.

Academic Projects

Wafeer – Nettle-Based Fertilizer (Agri-Tech) ill Nov 2023 – Sep 2024

- Took the concept from prototype to pilot, securing 50+ early adopters and generating EUR 12 k in revenue within the first six months.
- Developed a dynamic pricing model that improved profit margin by 15 % while maintaining market competitiveness.

Omiyummy – Ready-to-Eat Tunisian Meals (Food-Tech) ill Nov 2023 – Sep 2024

- Managed end-to-end production planning and inventory control for a 200-meal weekly batch, reducing food waste by 30 %.
- Validated demand through B2 B and B2 C channels, achieving 120 pre-orders before official launch.

Associative Experience

Student Entrepreneur – Sustainable Ventures Program, Université de Tunis ill Nov 2023 – Sep 2024
Co-founded two student-run ventures, overseeing product development, financial management, and market validation.
