

Mateo Silva

City, Country candidate.email@example.com +000 000 0000

Profile

Product Owner specialized in AI and Generative AI with a proven track record of turning business ideas into scalable, high-impact solutions. Experienced in AI product strategy, Agile/Scrum leadership, and end-to-end LLM deployment, I bridge product, technology, and market needs to deliver measurable value. Passionate about leveraging emerging AI technologies to create innovative products that drive revenue and improve user experience.

Education

University Name ill 2019 – 2023

Bachelor of Science in Computer Science

Relevant coursework: Machine Learning, Data Engineering, Software Project Management

Lycée Pilote de Sfax ill 2015 – 2019

Scientific Baccalaureate

Professional Experience

Product Owner – Responsable produit ill February 2026 – Present

OliveSoft, Sfax

- Managed the full product lifecycle of a B2 B e-commerce platform serving 120+ enterprise clients, increasing monthly active users by 35 % within six months.
- Prioritized and refined a Jira backlog of 250+ user stories, reducing average cycle time from 12 to 7 days (-42 %).
- Coordinated cross-functional Web, Infrastructure, and Data teams, achieving a 98 % on-time delivery rate for quarterly releases.
- Designed release communication templates and standardized the Jira issue lifecycle, cutting release-note preparation time by 60 %.
- Conducted acceptance testing for 15+ production releases, maintaining a post-release defect rate below 1 %.

Artificial Intelligence Engineer ill February 2024 – January 2026

OliveSoft, Tunisia

- Designed and deployed an AI agent that generated social-media content, reducing copy-writing effort by 40 % for 30+ marketing teams.
- Served as Scrum Master and AI Product Owner, leading a 7-member agile squad to deliver 4 forecasting and AI integration projects on schedule.
- Built a modular chat interface enabling dynamic selection among 5 LLMs (OpenAI, Gemini, Mistral, Phi-4, etc.) and seamless API integration.
- Led fine-tuning and deployment pipelines for state-of-the-art LLMs, improving model accuracy from 78 % to 92 % on domain-specific tasks.
- Integrated LangChain and Pinecone vector databases to power semantic search and Retrieval-Augmented Generation, cutting content-generation latency by 55 %.

Business Analyst ill July 2023 – August 2023

Digix, Gouvernorat City, Country

- Contributed to the development of the Eventilo platform, delivering 8 functional enhancements within a 6-week sprint.
- Resolved technical and functional bottlenecks, decreasing average issue resolution time by 30 %.
- Coordinated sprint planning and backlog grooming sessions for a 5-person development team.

Academic Projects

Generative AI Content-Generation Agent ill January 2023 – June 2023

- Developed a pipeline that fine-tuned a GPT-based model on a proprietary marketing dataset, achieving 94 % BLEU score on held-out content.
- Implemented RAG with Pinecone vector store, improving relevance of generated posts by 27 % as measured by human evaluators.

Associative Experience

Member – AI Tunisia Community ill September 2022 – Present

Skills

% **AI & Machine Learning:** LLM fine-tuning, Retrieval-Augmented Generation, LangChain, Prompt Engineering
Product Management: Road-mapping, User Story Writing, KPI Definition, Market Research
Agile & Scrum: Scrum Master, Sprint Planning, Backlog Prioritisation, Jira
Technical Tools: Python, C, SQL, Pinecone, Docker, Git, Power BI, Microsoft 365
