

Zoe Walker

City, Country candidate.email@example.com +000 000 0000

Profile

Data & Cloud Engineer with a strong focus on Google Cloud Platform, building scalable and reliable data pipelines. Passionate about turning complex datasets into actionable insights, optimizing workloads, and delivering data-driven products that empower business decisions.

Education

University Name ill 2020 – Present

B.Sc. in Computer Science

Relevant coursework: Distributed Systems, Database Design, Cloud Computing

Lycée Pilote de Sfax ill 2017 – 2020

Scientific Baccalaureate

Professional Experience

Data Engineer ill Oct 2024 – Present

Skill and You, Remote

- Industrialised and automated the data platform on GCP using Python, dbt, Terraform, Airbyte, Cloud Run and API integrations, reducing manual effort by 70%.
- Designed and migrated 15+ data sources and tables to a BigQuery-based architecture, improving data consistency and scalability.
- Optimised dbt and BigQuery workloads, cutting scan costs by 50% while maintaining SLA compliance.
- Built a customer-data deduplication pipeline with Braze, guaranteeing 99.9% data quality for engagement use-cases.
- Developed a Braze event ingestion pipeline and data models powering 4+ marketing performance dashboards.
- Created a B2 B contract churn-risk scoring solution that cut manual analysis time from several days to a few hours per week.
- Delivered 3+ operational dashboards covering team performance and monthly activity, increasing reporting efficiency by 40%.
- Collaborated with business, BI and engineering teams to translate requirements into reliable, scalable data solutions.

Data Engineer ill Sep 2024 – Present

OliveSoft, City, Country

- Developed a Flask application for CSV ingestion with error handling and dynamic configuration from GCS to the data warehouse.
- Deployed the application in a serverless environment and implemented a CI/CD pipeline, achieving zero-downtime releases.
- Migrated and containerised legacy Talend jobs onto a Kubernetes cluster, reducing job execution time by 30%.

Data Engineering Intern ill Feb 2024 – Jun 2024

OliveSoft, City, Country

- Assisted in building ETL pipelines for financial data, processing over 10 M records daily.
- Implemented monitoring dashboards with Grafana, improving incident detection latency by 25%.

Academic Projects

Scalable Education Data Pipeline ill Jan 2023 – Jun 2023

- Designed an end-to-end pipeline on GCP (Pub/Sub, Dataflow, BigQuery) that processed 5 M+ events per month with 99.5% reliability.
- Achieved 92% model accuracy for student-learning-path recommendation using LightGBM.

Real-time Marketing Attribution System ill Sep 2022 – Dec 2022

- Implemented a streaming solution with Kafka and dbt that reduced attribution latency from 24 h to 5 min.
- Integrated Braze API for real-time audience segmentation, increasing campaign ROI by 15%.

Associative Experience

Member – Tunisian Data Engineering Community ill Mar 2022 – Present

Skills

% **Programming Languages:** Python, SQL, JavaScript, Bash, C
Data Engineering Tools: dbt, Airbyte, Apache Beam, Kafka, Talend
Cloud Platforms: Google Cloud Platform (BigQuery, Cloud Run, Dataflow, Pub/Sub), AWS (S3, Lambda)
Infrastructure & DevOps: Terraform, Docker, Kubernetes, GitHub Actions, CI/CD
Analytics & Visualization: Looker, Tableau, Power BI, Grafana

Languages

English: Full Professional **French:** Full Professional **German:** Elementary **Arabic:** Native or Bilingual

Certifications and Awards

- Microsoft Certified: Azure Fundamentals
- Application Development using Microservices and Serverless (Microsoft)
- dbt Fundamentals
- Google Cloud Computing Foundations Certificate
- Associate Data Practitioner Certification (Google)
- Google Cloud Professional Data Engineer (x4)
