

# Nora Ellis

Sfax, Tunisia | candidate.email@example.com | +000 000 0000 |

## Profile

Data Platform Team Lead and Google Cloud Platform Data Engineer with 4+ years of experience designing, building, and optimizing end-to-end data pipelines for clients across finance, retail, and logistics. Proven track record of reducing processing costs by up to 35 % and accelerating data delivery from days to minutes. Passionate about leveraging modern cloud-native tools (Databricks, dbt, GCP) to enable data-driven decision making.

## Education

**National Engineering University Name** ill 2017 – 2021

Computer Science Engineering, European accreditation

**Institut Préparatoire aux Études d'Ingénieur de Sfax (IPEIS)** ill 2015 – 2017

Preparatory engineering program, focus on mathematics and computer science

## Professional Experience

**Data Platform BI Team Lead** ill Sep 2022 – Present

*OliveSoft, Paris, France*

- Lead a cross-functional team of 6 engineers to deliver 15+ production-grade data pipelines on GCP, serving > 200 TB of raw data per month.
- Designed and implemented a Databricks-based lakehouse architecture that cut query latency by 40 % and reduced storage costs by 25 %.
- Introduced dbt for data transformation, increasing code reuse by 30 % and enabling automated testing of 200+ models.
- Mentored junior engineers, resulting in a 20 % improvement in sprint velocity.

**Consultant GCP Dataflow** ill Sep 2022 – Present

*CELINE, Paris, France*

- Optimized Dataflow jobs for a logistics client, processing 10 TB daily while cutting operational costs by 30 % through autoscaling and custom windowing.
- Automated end-to-end data validation pipelines, decreasing data-quality incidents from 12 per month to 1 per month.

**DevOps Intern** ill Feb 2022 – Nov 2022

*Talan Tunisie, Tunis, Tunisia*

- Built CI/CD pipelines with GitLab CI, reducing deployment time from 45 min to 12 min ( 73 % improvement).
- Containerized legacy Python services using Docker and orchestrated them with Kubernetes, increasing system uptime to 99.8 %.

**Web Developer** ill Jul 2021 – Nov 2022

*DK Soft, Sfax, Tunisia*

- Developed 5 responsive web applications with Django and React, achieving an average 25 % increase in user engagement.
- Integrated RESTful APIs and implemented OAuth2 authentication, enhancing security and reducing login issues by 90 %.

## Academic Projects

**Real-time Data Lake on GCP** ill Jan 2023 – Jun 2023

- Designed a streaming pipeline using Pub/Sub, Dataflow, and BigQuery that ingested 500 GB/day with sub-second latency.
- Applied dbt for transformation and built dashboards in Looker, enabling business users to monitor KPIs in real time.

## Associative Experience

Data Mentor – DataScience Tunisia ill Jan 2022 – Present

Volunteer mentor for a community of 120+ aspiring data engineers, delivering monthly workshops on GCP, dbt, and Databricks.

## Skills

**% Data Engineering:** GCP (BigQuery, Dataflow, Pub/Sub, Cloud Composer), Databricks, dbt, Airflow, Kafka

**Programming:** Python, SQL, Java, Bash, LaTeX

**DevOps & CI/CD:** Docker, Kubernetes, GitLab CI, Terraform

**Visualization & BI:** Looker, Tableau, Power BI

**Project Management:** Agile Scrum, Kanban, Management 3.0

## Languages

**Arabic:** Native    **French:** Professional    **English:** Fluent

## Certifications and Awards

---

- Google Cloud Certified – Professional Data Engineer (PDE)
- Databricks Associate Data Engineer
- IEEEEXTREME Programming Competition – 14.0 (Top 5%)
- MTA: Introduction to Programming using Python
- Management 3.0 Foundation Workshop
