OliveSoft x CSTAM 3.0

Automated RFP Intelligence & Proposal Generation

Team Task Assignment – Phase 1 (with Phase 2 items pulled forward)

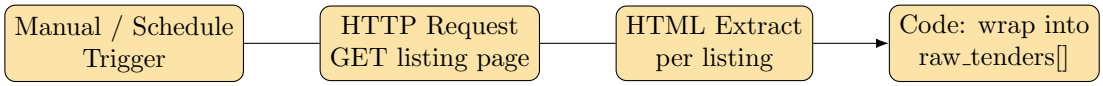

Overview

The system is one automated pipeline: a tender is detected, its requirements are extracted, OliveSoft's internal knowledge base is searched for matching assets, the prospect is researched, a fit score is computed, and a branded proposal is drafted and rendered. Every person below owns one stage. **Each stage has a fixed input schema and a fixed output schema** – work independently against the example input given, and hand off using the exact output schema shown, so nobody blocks anybody else.

1 Person 1 – n8n Trigger & Orchestration

Role. Fire the pipeline (manually for demos, on schedule for automation) and fetch the raw tender source. Also responsible for wiring everyone's nodes together in n8n once each piece works.

output to Person 2

Input (test source)

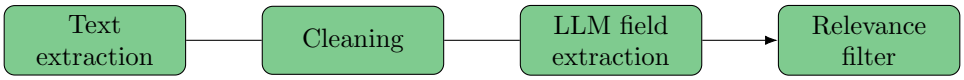

URL to scrape: `https://domainetat.tn/?cat=9&paged=1&lang=fr`

Output – exact JSON to hand to Person 2

```
{
  "source": "domainetat.tn",
  "fetched_at": "2026-09-04T10:00:00",

    }
  ]
}
```

2 Person 2 – Tender Extraction Service

Role. Turn one raw tender text into a clean structured record: client, sector, deadline, requirements, relevance flag.

Input – one raw tender (real example)

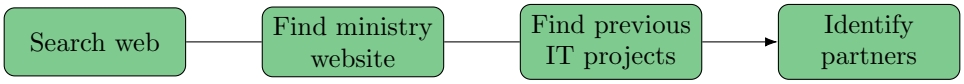

```
{
  "raw_text": "Le Ministere du Tourisme et de l'Artisanat se propose de lancer
     un appel d'offres pour le developpement d'une plateforme de gestion
     digitale permettant la gestion digitale des etablissements touristiques
     classes, incluant un module de suivi des licences, un tableau de bord
     analytique, et une API d'integration avec les systemes existants. Delai de
      remise des offres : 30 septembre 2026. Budget estime : 450 000 - 600 000
     TND. Exigences techniques : React ou Angular, Node.js ou Java/Spring,
     PostgreSQL, API REST, hebergement cloud (AWS/Azure). Equipe minimale : 3
     developpeurs seniors, 1 chef de projet certifie PMP, 1 designer UX/UI.
     Experience requise : au moins 2 projets numeriques dans le secteur public,
      certification ISO 27001 preferee. Duree du projet : 6 mois a compter de
     la signature du contrat.",
  "date": "15 aout 2026",
  "source_url": "internal://mock-dataset/TN-2026-0847"
}
```

Output – exact JSON to hand to Person 3, Person 4 and Person 5

```
{
  "tender_id": "TN-2026-0847",
  "title": "Developpement d'une Plateforme de Gestion Digitale pour le
     Ministere du Tourisme",
  "client": "Ministere du Tourisme et de l'Artisanat",
  "sector": "Public / Government - Tourism",
  "deadline": "2026-09-30",
  "estimated_budget": "450000-600000 TND",
  "requirements": {
    "technical": ["React or Angular frontend", "Node.js or Java/Spring backend"
       , "PostgreSQL", "REST API", "Cloud hosting (AWS/Azure)"],
    "team": ["Minimum 3 senior developers", "1 project manager PMP certified",
       "1 UX/UI designer"],
    "experience": ["2+ previous public sector digital projects", "ISO 27001
       preferred"],
    "timeline": "6 months from contract signature"
  },
  "relevant": true,
  "relevance_confidence": 0.94
}
```

3 Person 3 – Agentic Prospect Research

Role. Given a client name, autonomously search the web and build a prospect profile: sector, scale, past digital projects, partners, domain notes.

Input – taken from Person 2's output (only 2 fields needed)

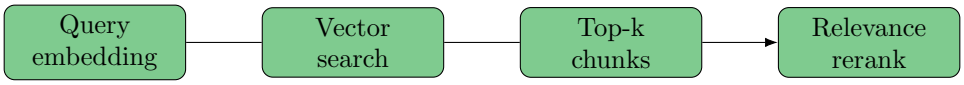

```
{
  "client": "Ministere du Tourisme et de l'Artisanat",
  "sector": "Public / Government - Tourism"
}
```

Output – exact JSON to hand to Person 5

```
{
  "client": "Ministere du Tourisme et de l'Artisanat",
  "sector": "Public / Government - Tourism",
  "estimated_scale": "Mid-size public digital transformation project",
  "past_digital_projects": [
    "Plateforme de licences touristiques (2022)",
    "Tableau de bord national du tourisme (2024)"
  ],
  "key_partners": ["Agence Nationale de Promotion du Tourisme (ANPT)", "Office
     National du Tourisme Tunisien (ONTT)"],
  "domain_notes": "Strong emphasis on regulatory compliance, licensing
     traceability and public transparency; procurement runs through TUNEPS."
}
```

4 Person 4 – RAG Knowledge Retrieval + Benchmark

Role. Index OliveSoft's internal documents (CVs, past projects, tech stacks) in a vector database, and retrieve the best-matching assets for a given tender's requirements.

Input – taken from Person 2's output (only requirements needed)

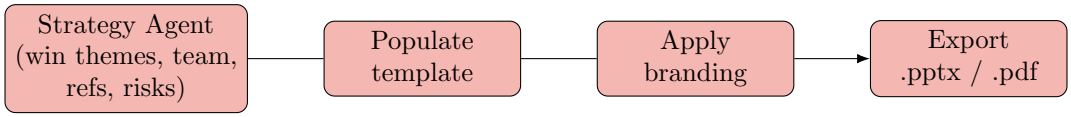

```
{
  "technical": ["React or Angular frontend", "Node.js or Java/Spring backend",
     "PostgreSQL", "REST API", "Cloud hosting (AWS/Azure)"],
  "team": ["Minimum 3 senior developers", "1 project manager PMP certified", "1
      UX/UI designer"],
  "experience": ["2+ previous public sector digital projects", "ISO 27001
     preferred"]
}
```

Output – exact JSON to hand to Person 5

```
{
  "matches": [
    {
      "doc_id": "CV_Ahmed_Bouazizi.pdf",
      "type": "cv",
      "similarity_score": 0.89,
      "summary": "Senior React/Node.js developer, 6 years, worked on 3 public-
         sector portals including a licensing platform for the Ministry of
         Interior."
    },
    {
      "doc_id": "Project_MinistryInterior_LicensingPortal.pdf",

    "embedding_model": "all-MiniLM-L6-v2",
    "chunk_size_words": 200,
    "chunk_overlap_words": 50
  }
}
```

5 Person 5 – Proposal Strategy Agent + Rendering Service

Role. Combine tender requirements, RAG matches, prospect research and fit score into proposal content (win themes, team, references, risks), then render it into an actual branded `.pptx` and `.pdf`.

Input – combined payload (tender + RAG matches + research + fit score)

Note: the `fit_score` object below is a mock – treat it as the already-completed bonus Fit Scoring Service output; do not build it yourself.
